

LISEVOS

Over the years, the school has grown significantly, now enrolling thousands of students and attracting community respect for its remarkable progress and commitment to quality education. In recognition of this growth, national leaders including the former Vice President of Uganda have lauded the school's contributions to education and community development.

We take pride in our modern facilities, including spacious classrooms, well-equipped workshops, and a large library designed to support academic excellence and research. Our graduates consistently excel, with many earning bursaries and scholarships as a result of their hard work and dedication.

At Light Secondary and Vocational School, every student's potential is valued, and we strive to create an environment that fosters lifelong learning, creativity, faith, and service. We believe that education is the light that guides communities toward growth, prosperity, and positive change.

Mr Joseph Mbuga Kiberu Ssalongo the founder of Light Schools Bulenga.

Founded in 1993 with humble beginnings in a garage and only one student, Light Secondary and Vocational School, Bulenga has grown into one of the most respected education complexes in Wakiso District, Uganda. Today, the school forms part of the broader Light Schools Bulenga Complex, which includes nursery, primary, secondary, and vocational training programmes, all committed to excellence in both academic and practical education.

Our mission is to equip young people with knowledge, character, and skills that enable them to thrive in a fast-changing world. Anchored in strong Christian values and guided by a dedicated team of professional educators, we nurture students to become responsible, innovative, and compassionate leaders of tomorrow.

Light Secondary and Vocational School is a mixed day and boarding institution that offers a balanced blend of academic education and vocational training. In addition to excellent classroom instruction, we provide hands-on skills development in areas such as electrician and electronics, tailoring and garment design, carpentry and welding, hair dressing, bakery and cookery, vehicle mechanics, and building & plumbing – empowering our students to be job creators rather than job seekers.
